

# BayLift

Loading Bay design

Vertical BayLift with platform lowered

The BayLift is ideal for lifting loads between different levels where the height difference is less than 1500mm, such as loading bays and docks.

With no need for a lift pit the BayLift offers a practical load handling solution where alternative equipment such as conventional scissor lifts or dock levellers cannot be installed.

Separate versions are available with capacities from 500kg to 1000kg along with a range of platform sizes that ensure the BayLift can safely handle crates, pallets, roll cages, sack barrows and many other loads.

## > FEATURES

- 500kg or 1000kg maximum working load
- Platform size up to 2400mm x 1500mm
- Folding barrier on platform
- 2 stop lift, up to 1500mm travel height
- Constant pressure control
- Floor mounted, no pit required
- Folds away after use

## > OPTIONS

- Bespoke platform sizes
- Trolley stop or anti-roll-off toe on platform
- Outside installation
- Free standing mounting bracket

# BayLift Fully Guarded

Fully Guarded design

Loading bay level

A cost effective BayLift suitable for exterior sites and for loading applications where the change in level is less than 2500mm. Fully guarded for extra safety and security.

## > FEATURES

- 500kg or 1000kg maximum working load
- Platform size up to 2500mm x 1500mm
- Up to 2500mm travel height
- 2000mm high gates at both levels
- Electrically interlocked gates
- Constant pressure control
- Floor mounted, no pit required
- Self-supporting mesh shaft

## > OPTIONS

- Bespoke platform sizes
- 90° loading or additional entrances
- Trolley stop or anti-roll-off toe on platform
- Outside installation
- Choice of finish
- Clad enclosure
- Additional height gates

# Planned Maintenance

Our nationwide network of highly trained, specialist lifting equipment engineers delivers excellent maintenance, repair and refurbishment services to keep your goods and business moving.

Planned maintenance programmes including scheduled annual Statutory Testing give business owners peace of mind that they are complying with current UK legislation.

Our emergency breakdown service ensures your equipment is up and running in no time. Engineers carry a full stock of replacement parts so that in almost all cases they can fix any issues on their first visit.

Penny Hydraulics have many special national planned maintenance programmes in place for large national restaurant chains, retail outlets, vehicle manufacturers, pub companies, hotels and breweries covering multiple sites across the UK.

A 12-month warranty is provided as standard with all mezzanine floor and cellar lifts.

## > PLANNED MAINTENANCE

Our key services include:

- Statutory Examinations & Testing in accordance with LOLER
- Maintenance in accordance with manufacturers' guidelines
- Inspection
- Service
- Issuing of Test Certificates
- Quality Reports & Surveys
- No sub-contract labour
